PROFESSIONAL PROFILE

Student of **Applied Mathematics** with a solid technical foundation and a proven track record in **leadership** and **strategic vision**. Demonstrated ability in **Problem Solving** as a member of the **UP Competitive Programming Team** and ICPC 2025 National Finalist. Leader of the F1 in Schools team, achieving a **record of $1.5M MXN in sponsorships** and **international recognition** (Winner of the F1 Sustainability Award).

ACADEMIC BACKGROUNDBACHELOR'S DEGREE IN APPLIED MATHEMATICS

- Universidad Panamericana (UP)
- *7th Semester | Expected graduation: December 2027*
- **Current grade: 9.3/10**
- **Recognition:** Panteras Scholarship.
- English level C1 TOEFL ITP & IELTS certifications

HIGH SCHOOL

- Prepa UP
- Area 1

RESEARCH PROGRAM IN GENERATIVE MODELING FOR SAMPLING

- Polymath Jr
- Summer 2026 - Today
- Mentored by:
    - Giulio Trigila, CUNY
    - Ricardo Baptista, University of Toronto
    - Derek DeBlieck, University of Nebraska-Lincoln

INTENSIVE PROGRAM IN COMPUTER SCIENCE AND MACHINE LEARNING

- Holberton (Anáhuac)
- *Completed in 2025 (18-month program).*
- *Divided into fundamentals and specialization in ML.*
- Projects: Natural disaster detection, Time Series Forecasting, Neural Style Transfer

LEADERSHIP EXPERIENCE AND ACHIEVEMENTS
LEADER PANTERAS RACING | F1 IN SCHOOLS UP
Silverstone (2022) and Singapore (2023)

- Led the Mexican team to the highest historical position in the world competition.

- Coordinated the **Marketing and Project Management** areas. Responsible for competition deliverables.
- Key player in securing over **1.5 million pesos in sponsorships**, surpassing the team's historical results.
- **Awards at the Singapore 2023 World Finals**:
    - **Winner of the Sustainability Award** (awarded by Formula 1).
    - Nominated for **Best Entrepreneurship Portfolio**.
    - Nominated for **Best Sponsorship Strategy**.
    - Winner of the **Silver Helmet**, the highest annual award presented by the **Mexican Motor Sports Federation**.

MEMBER OF THE APPLIED MATH COMPETITIVE PROGRAMMING TEAM

- Participated in the ICPC 2025 national final in Guadalajara.

MEMBER OF THE CONSULTING CLUB UP

- In my 5th semester, I was part of the Consulting Club.
- Extracurricular elective course.
- Went through a competitive selection process to be admitted.
- Focused on analyzing business cases.

NOTABLE PROJECTS

- Built a virtual computer from scratch where:
    - I designed the computer from its logic gates to its memory, ALU, and CPU.
    - I built my own compiler and programming language, going through various levels of abstraction.
    - I programmed an operating system capable of running games like Tetris.
- Natural disaster detection using U-net architecture.
- Design of an AI-based telemetry system for an industrial chemical plant.
    - Assemble, solder, and program electronics and sensors.
    - Built a physics-informed machine learning model for chemical distillation prediction and optimization.
    - Currently in the implementation phase at the actual plant.

NOTABLE CERTIFICATIONS

- **Machine Learning** | Stanford University (Coursera) - 2020
- **Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization** | DeepLearning.AI - 2020
- **Neural Networks and Deep Learning** | DeepLearning.AI - 2020
- **Mathematics for Machine Learning: Linear Algebra** | Imperial College London - 2021
- **Nand2Tetris (part 1 & 2)** | The Hebrew University of Jerusalem - 2025

TECHNICAL AND SOFT SKILLS

- **Languages and Frameworks: Python**, **C++**, **TensorFlow**, **PyTorch**.

- **Soft Skills:** Leadership, Strategic Vision, Creativity, Problem Solving, Systems Thinking.
